Detail-oriented and motivated individual with a strong background in Accounting and a passion for front-end web development. Proven ability to learn quickly, work collaboratively, and communicate effectively. Eager to bring a unique perspective to a dynamic team and contribute to developing cutting-edge websites and applications.

## Skills

---

- CSS | PostCSS | Tailwind CSS | HTML | JavaScript | React | Git |
- [Learning](#): TypeScript | Python

## Projects

---

### LITTLE LEMON RESTAURANT WEBSITE [LIVE](#) | [CODE](#)

- Final capstone project for Meta Front-end developer program on Coursera and in progress.
- Working on restaurant website which contains a detailed and responsive website with table-booking and online order functionalities built using React.
- Technologies: JavaScript, React, Tailwind CSS, HTML, JEST

### E-COMMERCE SHOPPING WEBSITE [LIVE](#) | [CODE](#)

- Built a single-page application using react-router which allows navigating without refreshing the page and using the browser history features.
- Registered admin user using Firebase authentication who only can add or delete shopping items.
- Customers can add shopping items to the shopping bag, and adjust the total number of items, and the whole shopping costs are totaled including the shipping costs.
- Technologies: JavaScript, React, Tailwind CSS, HTML, Firebase, and Cloudinary.

### YOUTUBE CLONE CODING [LIVE](#) | [CODE](#)

- Used Axios with a URL from an endpoint to get API data and React query to manage data requests.
- Displayed most popular videos on the main page and users can search for videos that they want to see and get the video's detailed information such as channel name, view counts and upload time.
- Technologies: JavaScript, React, Tailwind CSS, HTML, and Youtube API.
